NO MAC GEL

Stain remover gel for coloured stains

Manufacturer: Faber Chimica S.r.l. • Distributor: Stone+ bv

Product and benefits

NO MAC GEL is a water-based stain remover for hard surfaces. Its gel formula helps extract coloured stains and makes local treatment and vertical application straightforward. Ready to use, indoors and outdoors.

Target stains

Coffee, wine, tea, soft drinks and tomato sauce. Marker pens and ink. Mould, algae and plant residues. Treatment time depends on the type, age and depth of the stain.

Suitable surfaces

Marble-cement, marble-resin and quartz-resin agglomerates; slate, sandstone, basaltina/lava stone, molten basalt, concrete tiles and concrete; craquelé or glazed ceramics, clinker, cotto, granite, polished/natural/textured porcelain; limestone, marble, exposed brick, reconstituted stone, porphyry, quartzite, terracotta, travertine and tuff. Not suitable for carpet or fabric. Test joints, coatings and existing treatments beforehand.

Preparation

Thoroughly remove dirt and dust. Slightly wet highly absorbent surfaces. Protect nearby surfaces. Do not apply to hot surfaces or in direct sunlight. Allow new grout to cure completely. Carry out a test on an inconspicuous area or an unused piece of material.

Application

1. Use undiluted. Apply directly or spread with a brush or spatula, completely covering the stain. A professional mechanical polisher can be used over larger areas.
2. Leave to act until the stain is removed, following the indicative times and preliminary test.
3. Fully collect the product and residues with paper towels or cloths. On larger areas use suitable equipment or a compatible wet vacuum.
4. Wipe with a slightly damp cloth and rinse with water. Allow to dry completely before assessing results and reopening the floor to traffic.
5. Repeat if necessary. Mixed stains may require another stain remover, applied separately after complete residue removal and rinsing.

Indicative contact times

Coffee, wine, tea, soft drinks and tomato sauce: 30 minutes to 2 hours.
Marker pens and ink: 30 minutes to 3 hours.
Mould, algae and plant residues: 15 minutes to 1 hour.
These are guidelines, not guaranteed treatment times.

Application guidance

Never mix NO MAC GEL with other chemicals. Where needed, treat a larger coherent area, such as a whole tile, for an even result. Faber mentions sanding/polishing as a possible preliminary step for deep stains to improve absorption. This may alter the finish and requires professional assessment. Clean tools with water after use.

Technical characteristics

Form: gel. Colour: clear. Odour: hypochlorite. TDS pH: 11.5 ± 0.5. Specific gravity at 20 °C: 1120 ± 10 g/l. SDS revision 10 gives a pH of 12–13; the two source values are shown separately.

Packaging and storage

500 ml and 1 l bottles; 12 bottles per box. Shelf life: 24 months in original sealed packaging, stored in a cool, dry place. Keep the container tightly closed.

Safety

Danger. May be corrosive to metals. Causes severe skin burns and eye damage. Very toxic to aquatic life and harmful with long lasting effects. Contact with acids liberates toxic gas. Wear suitable protective gloves, clothing and eye/face protection. Follow the complete safety data sheet.

Source and responsibility

Stone+ edition v2.0 dated 25-10-2026, translated and formatted from Faber TDS revision 5.0 dated 17-10-2022. This is not a new manufacturer revision. Always test suitability for the material and intended use. Faber may update technical information and cannot control working conditions. This sheet does not guarantee results.
